Education

Hyderabad Institute of Technology and Management (HITAM)

B.Tech in Artificial Intelligence & Machine Learning, CGPA: 9.3/10 | Branch Topper 2023–2027

Professional Summary

AI/ML Engineering student (CGPA: 9.3/10) with hands-on experience in Machine Learning, Deep Learning, Data Analytics, Large Language Models (LLMs), Python, SQL, Django, and FastAPI. Currently working as an AI/ML Developer Intern at Galactix Solutions, developing AI-powered chatbot solutions for the KodeMi Labs EdTech platform. Experienced in building predictive models, conversational AI systems, analytics dashboards, and data-driven applications. Seeking opportunities in AI/ML Engineering, Data Analytics, and Intelligent Automation.

Experience

Galactix Solutions Pvt Ltd

AI/ML Developer Intern

Remote

Jan 2026–Present

- Developed AI-powered chatbot solutions for the KodeMi Labs EdTech platform using Large Language Models (LLMs) and conversational AI techniques.
- Contributed to the development of the **Learner AI Bot**, providing intelligent learning assistance, course guidance, and personalized support for students.
- Developed features for the Instructor/Trainer AI Bot to support trainer assistance, content management, learner engagement, and instructional workflow automation.
- Worked on prompt engineering, response optimization, and AI model evaluation to improve chatbot accuracy and user experience.
- Integrated AI services with backend APIs and collaborated on deployment-ready AI solutions.
- Performed data collection, cleaning, preprocessing, and preparation for machine learning workflows.
- Assisted in model testing, debugging, performance monitoring, and optimization of AI applications.
- Researched emerging AI frameworks, tools, and techniques to support ongoing product development.

HIDANI TECH

Data Operations Intern

USA (Remote)

Mar 2025–Jun 2025

- Extracted and validated business leads from large datasets.
- Performed data cleaning and preprocessing using MySQL.
- Improved data accuracy and maintained structured datasets for analytics workflows.
- Worked extensively with data validation, quality assurance, and reporting support.

Skills

Programming: Python, Java, SQL, C

Data & AI: Machine Learning, Deep Learning, CNN, Scikit-Learn, Pandas, NumPy, Data Analytics, Power BI, Excel, Data Visualization, LLMs, Prompt Engineering, Conversational AI

Frameworks & Tools: Django, FastAPI, MySQL, Git, GitHub, Jupyter Notebook, VS Code

Projects & Professional Development

AI Stress Detection System | Python, TensorFlow, CNN, Pandas: Developed a Deep Learning based stress detection system using Convolutional Neural Networks (CNNs) to classify stress levels from behavioral and health-related indicators. Performed data preprocessing, feature extraction, model training, and evaluation to improve prediction accuracy. Generated analytical insights through visualization and performance analysis.

Cafelytics | Python, Django, Scikit-Learn, MySQL: Built an AI-powered analytics platform that predicts meal popularity and customer preferences using Machine Learning models. Generated budget-friendly food recommendations based on user preferences and pricing constraints. Integrated predictive analytics into a Django-based web application to support data-driven canteen management and reduce food wastage.

Student Performance Predictor | Python, Django, Scikit-Learn: Built a Machine Learning application using Python, Scikit-Learn, Django, and Jupyter Notebook to predict student academic outcomes. Implemented classification models, data visualization, and real-time prediction through a web interface.

Resume Builder | PHP, MySQL, HTML, XAMPP: Led development of a web-based resume generation platform using PHP, MySQL, HTML, and XAMPP. Implemented authentication, database integration, form validation, and dynamic resume generation features.

Certifications & Achievements

2025: NPTEL Programming with Java (Elite)

2025: Deloitte Data Analytics Job Simulation (Forage) – Built interactive dashboards using Tableau and performed business data analysis.

2025: Selected for Smart India Hackathon (Internal Round)

2024: NPTEL Data Structures

2024: TASK Python Certification

2024: NxtWave Fellowship

Leadership: Class Representative and Team Lead for Problem-Based Learning, HITAM (2023–2024)
